# Spooky Felt Banner

by Chris Malone

### INSTRUCTIONS:

Please read all instructions carefully before beginning project.

1. Enlarge pattern 400% on photocopier.
2. Cut a 28" x 36" rectangle from Black GlitterFelt.
3. To make ghost more opaque, follow manufacturer's directions to iron a 16" x 18" piece of non-woven backing to wrong side of White. Use disappearing fabric marker to trace patterns onto felt as indicated. Cut out ghost. Cut out ovals for eyes and mouth.
4. Cut remaining pattern pieces from felt as

indicated. Cut out eyes and mouth of pumpkin.

5. Arrange ghost and pumpkin on Black background with pumpkin 5" from bottom of banner with top of pumpkin overlapping ghost as shown in photo. Add stem and leaves and glue all pieces in place as shown. (Note: do not apply glue out to edges of ghost and pumpkin if adding stitching.)
6. If desired, use four strands of floss to sew a running stitch around edges of ghost and pumpkin.

(continued)

7. For bow on ghost, cut a  $2\frac{1}{2}$ " x 24" and a  $\frac{1}{2}$ " x  $2\frac{1}{2}$ " strip from Purple. Notch ends of large strips as shown (diag. A). Fold ends of large strip over the center and cross ends, forming a bow with the glitter side on top and leaving 5" "tails" as shown (diag. B). Pinch center of bow, or gather with needle and floss, and wrap small strip around center, gluing ends in back. Glue back of center of bow to ghost at the neck as shown.
8. For decorative edge, cut six evenly spaced triangles in bottom 3" of banner as shown. Cut six  $2\frac{1}{4}$ " circles from Purple. Center and glue one Purple circle in each triangle; sew button in center of each circle.
9. To stabilize top for hanging, cut a 2" x 28" strip of non-woven backing and iron to top of banner on wrong side. Sew rings to the back of the banner at corners for hangers.
